

DISCUSSION OF THE REFERENCES

Reference A: Lebens

Lebens discloses a flashlight having a DC voltage source and LED lights in the circuitry. Lebens discloses the state of the art of LED lights, but does not disclose the rechargeable circuitry, the optional flashing mechanism, and the attaching means disclosed in the present device. In addition, the Lebens device is in the shape of the standard flashlight rather than cylindrical with a clear central body and does not allow for the greater illumination of the panel of LED lights as set out in the instant application.
